

You're a **student** and don't have plans for the **17th of September** yet?  
You want to learn something valuable for free?  
You care about **sustainability** and the **future of our cities**?

Then, the **workshop at the JGU Mainz** is just right for you!  
You will be introduced to our 4 main topics by experts and afterwards work in small groups on one of them. These all relate to life in cities and the question how we can improve it.

Our topics are:

1. Artificial Intelligence 2. Green cities 3. Mobility 4. Urban diet

If you and your team have developed a really good idea, you can present it at the "Social Simulation Conference" a week later **//23rd of September//**.  
Your idea is supported by visualizations and music by a band.  
You have the unique opportunity to speak in front of scientists, politicians and other experts so that your ideas will be heard. One of the listeners will be Sabine Bätzing-Lichtenthäler, the Rhineland-Palatinate Minister of Demography.  
If you want to, you can take part in a discussion with experts after the presentation.

You also have the opportunity to **win 250 or 500 euros** as a team.  
In addition, each of you will receive **free access for the entire Tuesday of the conference**, including the opening night, of course.

We are happy to answer your questions.  
Just write us a message on Facebook or Instagram.

Since we have a **limited number of participants (20)**, it is worth giving us early notice!

You can register through this e-mail address: [ssc2019orga@uni-mainz.de](mailto:ssc2019orga@uni-mainz.de).  
If you already have a preference on one of the workshop topics, please let us know!

We look forward to welcoming you!
